Injection Laryngoplasty Hands-on Workshop

Friday, November 11, 2011
8:00–18:00

UKE, Hamburg, Germany

Dear colleagues,

among phonosurgical procedures, injection laryngoplasties have reached a high clinical standard. Although there is no ideal injectable material, we now have a plethora of applicable implant materials for augmentation. Parallel to this development, a shift can be seen to ambulatory, office-based patient care. This is especially true for vocal fold augmentation procedures in patients with unilateral vocal fold paralysis.

Our hands-on workshop will offer presentations on phonosurgery given by clinical experts, including video-demonstrations of typical cases, and discussion on excised laryngeal dissection specimens. All participants have the possibility to learn 'hands-on' how to inject into the vocal folds on excised cadaver larynges, using the most frequently applied techniques such as percutaneous and endoluminal approaches. Additionally, all injected specimens will be CT-scanned and images can be discussed in the afternoon.

Our special guest, Dr. Milan Amin, MD, from New York City will contribute not only with his professional clinical experience, but shows us how to inject through a thyro-hyoid approach, thus combining a percutaneous and endoluminal technique.

Each participant will receive a free copy of the book "Operative Techniques in Laryngology" by Blake Simpson and Clark Rosen.

We welcome you to Hamburg and are looking forward to seeing you in November.

Klaus Püschel, MD

Friday, November 11, 2011

8:00

Registration

8:50

Welcome

9:00–11:00

Indication, techniques and clinical setting for injection laryngoplasty. Laryngeal cadaver dissection (video demonstration)

11:00–11:30

– coffee break –

11:30–13:00

Hands-on Part I (including post-injection CT-scanning of all specimens)

13:00–14:00

– lunch break –

14:00–14:30

Discussion and review of CT imaging

14:30–15:30

Clinical cases and FAQs

15:30–16:30

Hands-on Part II

16:30–17:00

– coffee break –

17:00

Discussion, closing remarks
